APPENDIX

A1 Competitor Benchmark
A2 Audience Pain Points
A3 Individual Leader Benchmarks
A4 Your 2026 Content Performance

Program Goals

A strong national practice anchored in Houston/Texas and Washington, D.C. — built on three pillars: **legal analysis**, **lobbying & policy work**, and **strategic communications**

1

Close the Engagement Gap

Move avg engagement per environmental post from 10.7 to 25+ by shifting from link-promo to narrative-driven content across five focus areas: **permitting reform**, **environmental audits**, **PFAS**, **climate disclosure**, and **clean air**. Increase post length from 56–93 words to 120–160 words.

2

Expand Audience Reach

Speak to what C-suite, boards, and in-house counsel actually worry about. Expand environmental subthemes from 2 (Policy, Carbon) to 5+ (add ESG Strategy, Energy Transition, Renewables).

3

Activate Partner Thought Leadership

Launch 2–4 partner posts per month from individual profiles (Jason Hut, Seth Barsky, +1 TBD). Build the Sidley Austin playbook: expert voice drives 5–10× company page reach.

4

Build a Repeatable System

Create content workflows, AI tools, and employee advocacy cadences that scale beyond Environmental to other Bracewell practices. Drive BD leads, website referral traffic, and positive lawyer feedback.

Priority Audiences

Four industries × three stakeholder tiers = 12 segments. Every post should speak directly to at least one.

⚡ Energy

Tier 1 — Core client base. Broadest range of environmental issues.

- **Endangerment Finding rescission**: Clean Air Act uncertainty for existing permits
- **State enforcement acceleration**: 76% decline in federal civil lawsuits, but state AGs filling the gap
- **Permitting reform**: NEPA changes creating project-by-project uncertainty
- **Climate disclosure**: CA SB 253/261 Scope 1/2 reporting by Aug 2026

🏭 Heavy Manufacturing

Tier 1 — PFAS liability is existential. Massive regulatory exposure.

- **PFAS TSCA reporting**: April 2026 deadline, data required back to 2011
- **50-state EPR patchwork**: no federal floor, each state different
- **CERCLA strict liability**: joint-and-several for legacy contamination
- **Supply chain data gaps**: can't report what you can't track

💻 Data Centers

Tier 2 — Fastest-growing practice area. $98B in projects at risk.

- **300+ state bills filed** in first 6 weeks of 2026; moratoriums enacted
- **Water consumption scrutiny**: community opposition intensifying
- **Air permitting challenges**: backup generator emissions under EPA review
- **Energy demand doubling** by 2027 — grid reliability pressure

🏥 Healthcare

Tier 2 — Unique PFAS and medical waste exposure. Underserved by competitors.

- **PFAS in medical devices**: CERCLA exposure from products never manufactured
- **Pharma waste Subpart P**: new hazardous waste management obligations
- **Sustainability reporting**: patient and investor pressure on ESG credentials
- **Legacy contamination**: hospital site cleanup liability expanding

Where You Are Today

Competitor analysis (497 posts, 4 peer firms) + Bracewell's own 2026 environmental content (Jan 1 – Feb 2026)

22
Environmental posts (6 mo.)
42.3% of peer set (most volume)

10.7
Avg engagement per post
Hogan Lovells: 80.4

56 words
Avg TL word count
Top peers: 122–139 words

0%
Events/recap content
Hogan: 38% (106.7 avg eng)

2026 Content Performance (Your Data)

TYPE	AVG LIKES	AVG IMPRESSIONS
Awards	**20.5**	**979**
Events (pre-event)	3.0	445
Media/TL (link-promo)	**2.3**	325
Article/TL	**1.5**	365

ALGORITHM INSIGHT **The gap is stark:** Awards drive **13× the engagement** of link-promo TL. The Law360 Practice Group of the Year post (27 likes, 1,256 impressions) outperformed all other env content combined. TL posts average just 2 likes and zero comments — the format, not the expertise, is the problem. "Teach-before-you-pitch" posts see 3× higher CTR than promotional content.

What's Working & Key Gaps

- **Awards content is a proven winner**: Law360 POTY post — 27 likes, 1,256 impressions. Lawdragon video — 14 likes, 701 impressions. Lean into this
- **Volume leadership**: 42% of all env posts across peer set. The instinct to publish is right
- **Share performance**: +71.2% more shares than Bracewell's overall average

---

- **Link-promo TL averaging 2 likes, 0 comments**: the format is the #1 engagement drag — needs narrative rewrite
- **Events are pre-event promo only**: no post-event recaps. 3 upcoming events (Mar, Apr, May) are the first test
- **Hashtag overuse (95.5%)**: competitors range 0–50%. Top performers don't use them
- **68% of content covers Policy & Carbon only**: missing ESG Strategy (111.7 avg engagement elsewhere)

How the Algorithm Works for You

LinkedIn's 2025 algorithm shift is the engine behind every recommendation in this deck

LinkedIn now distributes content by topic, beyond your network.

In 2025, LinkedIn shifted from a **social graph** (who follows you) to an **interest graph** (what people care about). Every post is classified into topic clusters and tested against audiences who engage with similar themes. For Bracewell, this means: nail 2–3 environmental topics consistently, and LinkedIn will surface your content to exactly the audience you want — even if they don't follow you.

ALGORITHM INSIGHT

Topic Consistency = Reach

Creators who repeat 2–3 core topics for 90 days see **+27% avg reach** and **+41% topic-based follows**. Bracewell's five pillars are designed for exactly this signal:

REGULATORY PFAS ESG ENERGY CREDIBILITY

ALGORITHM INSIGHT

Conversation Is the Currency

Comments, saves, and profile clicks now outweigh likes. Posts that inspire long comment threads stay visible for weeks via "Suggested for You" feeds. **Saves alone increase resurfacing probability by 60%.** Narrative-driven posts earn 2× the comments of link-promo.

ALGORITHM INSIGHT

Teach > Promote

LinkedIn's classifier favors content that educates over content that sells. Across the peer set, thought leadership posts drive **9.4× more engagement** than link-promo posts. Hogan's 122-word narrative TL vs. Bracewell's 56-word link-promo tells the whole story.

The shift: From "Check out our latest alert" to "Here's what the Endangerment Finding rescission actually means for your permits." Same expertise, different packaging. The algorithm (and your audience) will reward the change immediately.

The Strategic Thesis

Grounded in Bracewell's three practice pillars: **legal analysis**, **lobbying & policy work**, and **strategic communications**

Share the alert and explain what it means.

Bracewell's Environmental practice rests on three pillars: **legal analysis**, **lobbying & policy work**, and **strategic communications**. LinkedIn content should reflect all three — go beyond summarizing regulatory alerts to explain what they mean (legal analysis), frame the policy implications (lobbying), and position the practice as the trusted voice (comms). Bracewell already publishes more environmental content than any competitor. The shift is from link-promo to insight-led narrative that puts the practice's full expertise on display. ALGORITHM INSIGHT Educational content earns 3× higher CTR than promotional content, and conversational tone drives +48% comment rate.

SECTION TWO

Content Pillars

Five topic pillars mapped to Bracewell's practice strengths, audience pain points, and competitive whitespace

Five Topic Pillars

Each pillar maps to practice strengths, audience pain points, and competitive whitespace. Content rotates across pillars weekly.

01

Regulatory Pulse

Permitting reform, environmental audits, clean air regulations, state enforcement, Endangerment Finding

COUNSEL C-SUITE

02

PFAS & Emerging Contaminants

TSCA reporting, CERCLA liability, state bans, industry-specific exposure, supply chain data

ALL SEGMENTS

03

Climate Disclosure & ESG

CA SB 253/261, SEC rules, ESG reporting, greenwashing defense, investor expectations

C-SUITE BOARD

04

Energy Transition & Infrastructure

Renewables permitting, data center challenges, NEPA reform, IRA tax credits

ENERGY DATA CENTERS

05

Practice Credibility & People

Awards, conference recaps, partner milestones, media coverage, podcast

ALL SEGMENTS

ALGORITHM INSIGHT **Why five pillars?** Each pillar maps directly to the practice's five named focus areas — permitting reform, environmental audits, PFAS, climate disclosure, and clean air — while reflecting the three practice pillars of legal analysis, lobbying & policy work, and strategic communications. Creators who repeat 2–3 core topics for 90 days see +27% average reach and +41% topic-based follows. LinkedIn's interest graph rewards this thematic consistency, building "topic trust" that surfaces Bracewell to the right audiences automatically.

Pillar 1: Regulatory Pulse

Permitting reform, environmental audits, clean air, state enforcement • 2–3 posts/week

CORE TOPICS

Permitting Reform

NEPA after CEQ: agency-by-agency permitting in a regulatory vacuum. A named practice focus area.

Environmental Audits

Proactive compliance audits, audit privilege and disclosure mechanics, self-reporting strategies. A named practice focus area.

Clean Air Regulations

Endangerment Finding rescission, existing permit requirements, technology-specific compliance. A named practice focus area.

State Enforcement Acceleration

76% decline in federal civil lawsuits, but citizen suits up 15% and state AGs filling the gap

AUDIENCE CONTEXT

C-SUITE	Strategic planning implications — how regulatory shifts and audit findings affect capital allocation and risk posture
BOARD	Oversight of compliance governance — when to commission audits, how to maintain privilege, disclosure obligations
COUNSEL	Audit privilege mechanics, permit modifications, agency-by-agency NEPA procedures, enforcement defense

SAMPLE HOOKS

> *The EPA rescinded the Endangerment Finding last month. But your existing Clean Air Act permits? Still in effect. Here's why that distinction matters...*

> *Environmental audits can save your company millions — or expose it to liability. The difference is how you structure privilege before you start...*

> *NEPA reform passed. But without CEQ guidance, each agency is making its own permitting rules. Here's the map...*

Pillar 2: PFAS & Emerging Contaminants

The #1 pain point across all 12 audience segments • 1–2 posts/week

CORE TOPICS

TSCA Reporting (April 2026)

Reporting window opens requiring data back to 2011 for manufacturers, importers, processors

CERCLA Strict Liability

Joint-and-several liability creating existential exposure for PFAS users and generators

50-State PFAS Patchwork

No federal floor: each state building its own bans, limits, and reporting requirements

Industry-Specific Exposure

Healthcare (medical devices), manufacturing (supply chain), data centers (emerging)

AUDIENCE CONTEXT

C-SUITE	Risk exposure quantification — financial impact of PFAS designations on operations and balance sheet
BOARD	Fiduciary duty — D&O coverage implications, disclosure obligations, oversight frameworks
COUNSEL	TSCA reporting mechanics, exemptions, multi-state compliance strategy, litigation defense

SAMPLE HOOKS

> *If your company has manufactured, imported, or processed PFAS since 2011, you have a reporting obligation starting April 2026. Here's what that means...*

> *Your company never made PFAS. But if your products contain them? Under CERCLA, that might not matter. Here's why healthcare companies need to pay attention...*

> *There is no federal PFAS standard. There are 50 different state standards. Here's how to build one compliance strategy that works...*

Pillar 3: Climate Disclosure & ESG Strategy

Highest engagement subtheme across competitors (111.7 avg). Bracewell currently at 0%. • 1–2 posts/week

CORE TOPICS

Jason Hut's Climate Disclosure White Paper

Serialized content series launching with the white paper — 3–4 posts from different angles

California SB 253/261

Scope 1/2 reporting by August 10, 2026 — the most broadly relevant state mandate

Greenwashing vs. Greenhushing

The dual-sided trap where both environmental claims and silence carry legal consequences

Board Fiduciary Duty

Only 2% of directors cite environmental expertise as a priority skill, yet liability is expanding

AUDIENCE CONTEXT

C-SUITE	Investor relations & capital access implications of climate disclosure requirements
BOARD	Personal liability exposure, greenwashing defense, audit committee relevance
COUNSEL	Multi-state compliance strategy, SEC vs. state reporting reconciliation

SAMPLE HOOKS

> *California's SB 253 requires Scope 1 and 2 reporting by August 2026. If your company does business in California, here's what you need to prepare...*

> *Say too much about your environmental record? Greenwashing lawsuit. Say too little? Shareholders sue for nondisclosure. Here's how to navigate the middle...*

> *Only 2% of corporate directors cite environmental expertise as a priority skill. Meanwhile, environmental liability at the board level has never been higher...*

Pillar 4: Energy Transition & Infrastructure

Fastest-growing area. Data center electricity demand could double by 2027. • 1–2 posts/week

CORE TOPICS

Data Center Permitting

Navigating air, water, and community opposition simultaneously — 300+ state bills filed in early 2026

NEPA After CEQ

Agency-by-agency permitting in a regulatory vacuum post-CEQ guidance withdrawal

IRA Tax Credits under OBBBA

Compressed timelines and qualification uncertainty for energy transition projects

Renewables vs. Traditional Energy

Where environmental law treats them differently — permitting, compliance, and risk profiles

AUDIENCE CONTEXT

C-SUITE	Speed-to-market advantage — how permitting reform affects project economics and timelines
BOARD	Oversight of project pipeline risk — $98B in projects at risk from env litigation
COUNSEL	Technology-specific permitting requirements, multi-jurisdiction compliance

SAMPLE HOOKS

> *300 state bills filed on data centers in the first six weeks of 2026. Here are the five that pose the greatest risk to your portfolio...*

> *CEQ withdrew its NEPA guidance. Now every federal agency is making its own permitting rules. Here's the map of who's doing what...*

> *Your data center needs air permits, water permits, and community buy-in. Here's what's changing in each area simultaneously...*

Pillar 5: Practice Credibility & People

Awards, conference recaps, partner spotlights, media coverage, podcast • 1–2 posts/week

CORE TOPICS

Awards & Rankings

Already proven: Law360 POTY post — 27 likes, 1,256 impressions (13× TL avg). Lawdragon Green 500 — 14 likes, 701 impressions. Your highest-performing content type.

Conference Recaps (3 Upcoming)

Mar 18: Sahay at ABLC (low-carbon fuels). Apr 23: Holmstead at ABA Spring Conf (Clean Air Act). May 5: Bracewell Env Law Seminar (Houston). First test of recap format.

Partner Spotlights

Jason Hut (climate disclosure), Seth Barsky, Shailesh Sahay (low-carbon fuels), Jeff Holmstead (Clean Air Act)

Environmental Law Monitor Podcast

Relaunching — serialized content asset. 21% of top-performing env TL references a series or podcast

WHY THIS PILLAR MATTERS

DATA	Awards avg 20.5 likes & 979 impressions in 2026. TL link-promo averages 2 likes & 325 impressions. This pillar is your highest-ROI content type
GAP	0% post-event recap content today. Hogan gets 106.7 avg engagement from env events (38% of mix). Three confirmed events give you the first test
PIPELINE	ABLC (Mar 18, DC), ABA Spring Conf (Apr 23, Minneapolis), Bracewell Seminar (May 5, Houston) — controllable content, no regulatory dependency

SAMPLE HOOKS

> *Shailesh Sahay just spoke on aligning US and EU incentives for low-carbon fuels at ABLC. Three things that stuck with us...*

> *Environmental Law Monitor is back. In our first episode, we're tackling the question every in-house counsel is asking right now...*

> *Jeff Holmstead is on a panel at the ABA Spring Conference on regulatory changes under the Clean Air Act's Endangerment Finding. Here's what we expect to be the most contentious question in the room...*

Six Signature Formats

Repeatable templates the marketing team can produce consistently. ALGORITHM INSIGHT Document posts (carousels) earn +47% engagement and +23% reach. Text + Image is the most reliable anchor format (+16% engagement).

📜 The Regulatory Breakdown

120–180 words. Trend framing hook → what changed → what it means for [audience] → forward-looking implication. Narrative voice, no outbound link in body. Branded infographic or key stat visual.

PILLAR 1 PILLAR 2 PILLAR 3

🎤 The Conference Recap

100–150 words. "3 things we took away from [Event]" → numbered insights with 1–2 sentence explanations → closing thought or question. First-person voice (partner or team), observational.

PILLAR 5

⚠️ The Industry Alert

80–120 words. Urgency hook → specific deadline or development → who's affected → one concrete action step. Direct, practical, no jargon. Branded deadline graphic.

PILLAR 2 PILLAR 4

📊 The Carousel Deep-Dive

8–12 slides, 30–50 words/slide. Hook slide → problem framing → 4–6 data points → implication → CTA in comments. Vertical format (Canva). Best for comparisons, checklists, frameworks.

PILLAR 2 PILLAR 3 PILLAR 4

👤 The Partner POV

100–160 words. Personal stake/observation → expert analysis in first person → forward-looking opinion → no CTA. Posted from individual partner profiles. Individual voice configured per brand voice profile.

PILLAR 1 PILLAR 3 PILLAR 5

📰 The Media Aggregator

60–80 words intro + 4–6 slide carousel. Brief framing intro → carousel slides with publication logo, headline, 1-line summary. Use when 4+ media hits land in same week on related topics.

PILLAR 5

Content Mix & Cadence

4–6 dedicated environmental posts per week on the company page + 2–4 partner posts per month

Weekly Content Mix

DAY	PILLAR	FORMAT
Monday	Regulatory Pulse	Regulatory Breakdown
Tuesday	PFAS / Climate	Industry Alert or Carousel
Wednesday	Energy Transition	Breakdown or Carousel
Thursday	Practice Credibility	Recap / Award / Media
Friday	Rotating	Partner POV (individual)
As needed	Any	Breaking news / alerts

Employee Advocacy (Social HP): 3–4 pre-drafted share options per company page post. Partner-exclusive versions for individual thought leaders.

Posting Rules

- **Minimum 100 words** per thought leadership post (target 120–160)
- **Maximum 2 hashtags** per post (event-specific only)
- **Links in first comment**, never in the post body
- **Always include an image** or carousel (3.9× engagement)
- **No repost-with-commentary** as primary format
- **Conference content = recap**, not promo
- **No politics** — regulatory analysis and business impact only
- **No client event publicity** — env practice clients too sensitive
- **Space same-source content** 7+ days apart
- **Maximum 8 @mentions** per post (likely to engage back)
- **AI content guardrail:** Use AI for ideation and structure only. Add practitioner data, client scenarios, and specific analysis to every draft. ALGORITHM INSIGHT Fully AI-generated posts get 2.8× less reach; AI-assisted with human edits performs at near-human levels

ALGORITHM INSIGHT **Month 1 A/B Tests:** Post length (80–100 vs. 140–180 words) • Hook style (question-led vs. narrative framing) • Hashtag usage (0 vs. 2) • Link placement (body vs. first comment). 4 posts per variant, measured by engagement rate. Optimal posting frequency: 4×/week is sustainable with active engagement; minimum 18 hours between posts to avoid self-cannibalization.

30-Day Launch Plan

Week-by-week execution calendar starting March 2, 2026

Week 1: Mar 2–6

THEME: CLIMATE DISCLOSURE WHITE PAPER LAUNCH

- **Mon:** White paper launch — narrative intro (Company Page) + Jason Hut Partner POV
- **Tue:** White paper angle #2 — board-level disclosure obligations
- **Wed:** Endangerment Finding — what permits still require
- **Thu:** Law360 Practice Group of the Year (if announced) or other award
- **Fri:** PFAS TSCA April 2026 reporting window alert

Week 2: Mar 10–14

THEME: PFAS LIABILITY + ENERGY FOCUS

- **Mon:** "PFAS Reporting 2026: 5 Things Manufacturers Need to Know" (carousel)
- **Tue:** State enforcement trends in energy sector
- **Wed:** White paper angle #3 — investor vs. anti-ESG pressure
- **Thu:** Data center state legislative tracker alert
- **Fri:** Seth Barsky Partner POV on emerging env issue

Week 3: Mar 17–21

THEME: ABLC CONFERENCE + BOARD GOVERNANCE

- **Mon:** Board governance — environmental oversight as fiduciary duty
- **Tue:** Pre-event for Shailesh Sahay's ABLC panel: "Aligning Regulatory & Market Incentives for Low-Carbon Fuels" (Washington, DC)
- **Wed 3/18:** ABLC day-of coverage — live highlights or key quotes from Sahay's panel
- **Thu 3/19: Conference recap** — "3 takeaways from ABLC on US-EU low-carbon fuel alignment" (Sahay recap, narrative format)
- **Fri:** Jason Hut Partner POV — serialized "What we're watching"

Week 4: Mar 24–28

THEME: PODCAST RELAUNCH + SERIES MOMENTUM

- **Mon:** Environmental Law Monitor podcast relaunch announcement
- **Tue:** PFAS in healthcare — CERCLA exposure from medical devices
- **Wed:** First podcast episode with key takeaway (not "listen here")
- **Thu:** Media roundup carousel (if 4+ hits) or individual spotlight
- **Fri:** State enforcement carousel — state-by-state data

Partner Thought Leadership Activation

Individual expert voice is the #1 engagement multiplier. Company page + partner profiles = compounding reach.

PARTNER	FOCUS AREA	CADENCE	START
Jason Hut	**Climate disclosure, ESG strategy (practice chair)**	**2–3 posts/month**	**Week 1 (white paper)**
Seth Barsky	TBD — awaiting confirmation	1–2 posts/month	Month 2
Shailesh Sahay	Low-carbon fuels, energy transition, shipping	Event-driven	Mar 18 (ABLC panel)
Jeff Holmstead	Clean Air Act, Endangerment Finding	Event-driven	Apr 23 (ABA panel)

Brand Voice Configuration

Each partner gets an individual voice profile across four dimensions (Nielsen Norman Group scale):

Serious ↔ Funny: **3–4**

Matter-of-fact ↔ Enthusiastic: **2–3**

Irreverent ↔ Respectful: **4–5**

Casual ↔ Formal: **2–3**

Company Page vs. Individual Amplification

COMPANY PAGE

Official voice. Regulatory analysis. Awards. Announcements. All 6 signature formats.

PARTNER PROFILES

Expert voice. First-person POV. Conference insights. 5–10× company page reach per engaged partner.

EMPLOYEE ADVOCACY (SOCIAL HP)

Amplification layer. ~100 active users, 50% weekly. 3–4 pre-drafted share options per post.

The Justin Savage Model: Sidley's Justin Savage has 28.8K followers posting 6×/month. He carries the entire practice's LinkedIn presence from his individual profile. Jason Hut (climate disclosure) is the primary build. Sahay and Holmstead are event-driven activations — their confirmed panels (Mar 18 ABLC, Apr 23 ABA) create natural content moments for pre-event + recap posts from their individual profiles.

The Engagement Engine

Posting is half the program. Page management, employee amplification, and strategic commenting are the distribution multipliers. ALGORITHM INSIGHT Reply activity reduces reach decline by 14%.

Next Steps

Immediate action items to launch the 90-day pilot

Bracewell Action Items

- [ ] **Share environmental content performance metrics** — Week of Mar 2
- [ ] **Share upcoming events calendar** for environmental practice — Week of Mar 2
- [ ] **Share awards/rankings calendar** for upcoming announcements — Week of Mar 2
- [ ] **Provide writing samples** for Jason Hut and Seth Barsky — Week of Mar 2
- [ ] **Schedule platform onboarding call** via Sally's meeting link — ASAP
- [ ] **Confirm third partner** for thought leadership activation — Week of Mar 10
- [ ] **Provide Canva templates** (including new vertical format) — Week of Mar 10
- [ ] **Discuss whether head of Environment practice should be involved** — Open

InnovAItion Partners Action Items

- [x] **Deliver strategy document** (this deck) — Week of Mar 2
- [ ] **Create individual brand voices** for Jason Hut + Seth Barsky — Upon receipt of samples
- [ ] **Create default "Bracewell Environmental Partner" voice** — Week of Mar 2
- [ ] **Configure workflows + brand voices** in platform — Week of Mar 10
- [ ] **Set up monthly reporting** (requires company page access) — Week of Mar 10
- [ ] **Schedule recurring check-in cadence** — Week of Mar 2

> **Success Metrics:** Avg engagement per post (10.7 → 25+), content types used (2 → 5+), partner posts (0 → 2–4/month), advocacy participation (100 → 120 active), website referral traffic, BD leads, lawyer satisfaction.

APPENDIX

Supporting Data

Competitor benchmarks, audience pain point detail, and individual leader analysis

Competitor Benchmark

APPENDIX A1

Company page environmental content analysis across 4 peer firms • 497 total posts analyzed

METRIC	BRACEWELL	HOGAN LOVELLS	HUNTON ANDREWS KURTH	SIDLEY AUSTIN
Environmental posts	**22 (42.3%)**	**16 (16%)**	**12 (12.1%)**	**2 (2%)**
Avg engagement	**10.7**	**80.4**	19.2	122.5
Avg word count (env)	93	**139**	71	134
Environmental TL posts	**14**	6	8	0
TL avg engagement	**6.0**	**56.5**	12.5	—
Events/conference content	**0%**	**38%**	17%	0%
Share performance lift	**+71.2%**	—	—	—
Hashtag usage rate	**95.5%**	25%	50%	0%

Key Whitespace Opportunities

- **PFAS deep-dives by industry** — No firm creates industry-specific PFAS content
- **Board-level environmental governance** — No firm targets board audiences directly
- **Conference recaps with original analysis** — Insight-driven, not promotional
- **Data center environmental strategy** — Fastest-growing segment, no firm owns it
- **State-by-state compliance playbooks** — Federal deregulation shifted risk to states

Format Whitespace

- **Carousels** — Not used by Bracewell. High shareability for data-driven insights
- **Conference recaps** — 0% of env content today. Hogan gets 106.7 avg from events
- **Narrative TL (120+ words)** — Rare today. High performers run 80–180 words
- **Partner-bylined posts** — First-person voice is the engagement multiplier
- **Serialized content** — 21% of top TL references a series or podcast

Audience Pain Points

APPENDIX A2

Cross-cutting themes from 12 audience research reports (4 industries × 3 stakeholder tiers)

Top 5 Cross-Cutting Pain Points

- **PFAS liability is #1 across all segments** — TSCA reporting (April 2026) requires data back to 2011. CERCLA strict/joint-and-several liability creates existential exposure
- **Federal deregulation ≠ reduced risk** — 76% decline in EPA civil lawsuits, but citizen suits up 15%, state enforcement expanding, private litigation accelerating
- **California SB 253/261** — Appears in every segment. Scope 1/2 reporting by Aug 10, 2026. Most broadly relevant state mandate
- **Greenwashing vs. Greenhushing** — Dual-sided trap where both environmental claims and silence carry legal consequences
- **Board expertise gaps** — Only 2% of directors cite environmental expertise as priority skill, yet liability is expanding

Industry-Specific Triggers

INDUSTRY	UNIQUE PAIN POINT	CONTENT ANGLE
Energy	Endangerment Finding rescission	"What your permits actually mean now"
Manufacturing	50-state EPR patchwork + PFAS data gaps	"One compliance strategy across 50 states"
Data Centers	300+ state bills in 6 weeks; moratoriums	"Which bills pose greatest portfolio risk"
Healthcare	PFAS in medical devices + Subpart P	"CERCLA exposure from products you never made"

Content mapping principle: All content maps back to five named practice focus areas — **permitting reform**, **environmental audits**, **PFAS**, **climate disclosure**, and **clean air**. Each gets framed differently for C-suite (business impact), boards (fiduciary duty), and in-house counsel (actionable compliance steps). Environmental audits, in particular, cross every industry: proactive audit programs, privilege mechanics, and self-reporting strategy.

Individual Leader Benchmarks

APPENDIX A3

Top environmental thought leaders across competitor firms — the playbook for partner activation

Justin Savage — Sidley Austin

28,831 Followers

6.0 Posts/month

76.3 avg env engagement. Volume + events coverage + first-person voice. Carries Sidley's entire env LinkedIn presence from his individual profile. The model for Jason Hut.

Tom Boer — Hogan Lovells

1,684 Followers

1.6 Posts/month

72.6 avg env engagement. Substantive thought leadership averaging 107 words per post. Proves you don't need high volume — quality and depth drive engagement with fewer posts.

Nadira Clarke — Hogan Lovells

1,589 Followers

2.8 Posts/month

67.8 avg env engagement with **+138% engagement lift** on environmental content vs. non-environmental. Demonstrates that environmental topics are an engagement multiplier when done right.

The takeaway for Bracewell: Individual partner profiles consistently outperform company pages by 5–10× in reach and engagement. Jason Hut's climate disclosure expertise + Seth Barsky's emerging profile = the same formula. The system (workflows, voice profiles, advocacy cadence) just needs to support them.

Your 2026 Content Performance

APPENDIX A4

Environmental content posted January 1 – February 2026 + confirmed upcoming events

2026 Environmental Posts (Jan – Feb)

DATE	TYPE	TOPIC	LIKES	IMPR.

Confirmed Upcoming Events

DATE	EVENT	LAWYER	LOCATION
Mar 18	ABLC Panel: US-EU Low-Carbon Fuels	Shailesh Sahay	Washington, DC
Apr 23	ABA 55th Spring Conf: Clean Air Act Endangerment Finding	Jeff Holmstead	Minneapolis, MN
May 5	Spring 2026 Env Law Seminar	TBD (multi-partner)	Bracewell Houston

The format opportunity is clear: Awards drive 20.5 avg likes vs. 2.0 for TL link-promo — a **10× gap**. But you can't manufacture awards. What you *can* control is the format of your thought leadership. The three upcoming events are the first test: pre-event promo + post-event recap in narrative "3 takeaways" format. If recaps outperform the link-promo TL baseline of 2 likes, the strategy thesis is validated.

Note on event posts: The Ethanol 101 event posts (Jan 26 & Feb 1) were pre-event promotional only. The strategy recommends adding **post-event recaps with original analysis** — the format that drives 106.7 avg engagement for competitors. Sahay's ABLC panel on Mar 18 is the first opportunity to test this.

Thank You
